WHO WE ARE

EVOLUTRON represents the continuity of an entrepreneurial adventure started in 1995 by Mr. Marcel Durand and which today is conducted by his son Mr. Mathieu Durand.

Strong of some great partnerships in B to B production of controllers for agricultural needs, our company is now “returning” to its roots by offering some of its top quality products directly to agricultural producers.

Once known for its AGRITRON and ECONOFAN brands, we have never stopped innovating. Here is the fruit of our evolution, a range of products faithful to our slogan:

Simply Effective.
